

Long Term Capacity Allocation – Notice

Bunge Operations are pleased to advise that they are moving to the next stage of the Long Term Capacity allocation process for 2027/28 and subsequent seasons.

Overall, there has been large demand for Capacity. In accordance with Clause 3.6 of our Port Loading Protocols:

- Clients have been allocated the Capacity they applied for in slots where supply equals or exceeds demand; and
- we will now enter into negotiations with Clients in relation to slots where demand exceeds supply (ie, oversubscribed slots) to determine whether alternative allocations may satisfy their requirements.

Negotiations commence Tuesday 21 July and will conclude on 12 August 2026 ("Allocation Cut off Date").
